

Contents

Section I – WHY

1 Ergonomics and the Dental Microscope - 3

- 4 Surveys document significant ergonomic risk factors
- 8 Ergonomics and the Microscope
- 8 Positioning your Chair
- 9 Positioning the Patient Chair
- 11 Positioning the Microscope
- 12 Microscope Equipment and Ergonomics
- 12 Microscopes and work efficiency
- 13 Ergonomic Tips and Tricks
- 14 Loupes and Microscopes are not Ergonomic Equivalents

2 Endodontics and the Dental Microscope - 17

- 22 Endodontic Microscope History
- 23 Anatomic Discovery
- 24 Dr. Stropko's Observations on Endodontic Microscopy
- 26 Retreatment
- 27 Instrument Removal
- 27 Perforation Repair
- 27 Diminished need for Periapical Surgery
- 28 Overall Improved Quality
- 28 Access Opening
- 29 Better Overall Visualization
- 30 Access Debridement
- 30 Fractured Teeth
- 31 Enhanced Clinical Observation and Diagnosis

3 Periodontics and the Dental Microscope - 37

- 41 Better Overall Visualization with Light and Magnification
- 41 Micro Surgical Instrument Development
- 43 Atramatic Tissue Management
- 44 Accurate, Precise Incisions

- 44 Complete Debridement
- 44 Accurate Suture Placement
- 46 Better Primary Closure
- 46 Cosmetic Enhancement with Proven Better Overall Results
- 47 Refinement of Macrosurgery
- 48 Improved Motor Skills
- 48 More Rapid Healing
- 49 Decreased Post-Op Morbidity
- 49 More Predictable Root Coverage
- 50 Papilla Reconstruction
- 52 Atraumatic Surgery Equals Superior Revascularization
- 53 Periodontal Micro Surgery – The Studies
- 53 Study of Microsurgery and Mucogingival Procedures
- 54 Study of Microsurgery in Periodontal Regeneration
- 56 Revascularization Study
- 57 Dr. Belcher’s Observations on the Surgical Microscope

4 Restorative Dentistry and the Microscope - 61

- 65 Better Overall Visualization with Light and Magnification
- 67 Enhanced Clinical Observation
- 68 Improved Direct Cavity Preparation
- 68 Complete Caries Removal
- 69 Cracked Tooth Diagnosis
- 71 Finishing Direct Restorations
- 72 Improved Indirect Preparations
- 72 Accurate and Gentle Cord Placement
- 73 Evaluation of Impressions
- 74 Easy Meticulous Provisional Fabrication
- 74 Evaluate Indirect Restorations
- 76 Evaluating Fit, Cementation Cement Removal
- 77 Precise Occlusal Adjustmen
- 77 Overall Improved Quality
- 78 Better Patient Acceptance
- 78 Restorative Technique for Papilla Regeneration

5 Exodontia and the Dental Microscope - 85

- 85 Undesirable Exodontia Sequelae
- 87 Exodontia is Less Traumatic with Microscope

- 88 Microscope-Aided Exodontia – Case 1 Maxillary Molar
- 89 Crown removal and Initial Sectioning
- 89 Expanded Sectioning to allow for Root Displacement
- 90 Kerf is Deepened
- 91 Separating Ligament from Tooth
- 91 Beginning Root Displacement
- 92 Distal Root Displacement
- 92 Root Removal
- 92 Microscope aided Exodontia – Case 2 Maxillary Bicuspid
- 93 Root Sectioning Begins
- 95 Microscope Aided Exodontia – Case 3 Dilacerated Bicuspid
- 96 Intentional Fracturing of Tooth
- 97 Removing Palatal Fragment
- 100 Immediate Implant and Temporization
- 101 An Operating Microscope is Essential for These Procedures

6 The Lab and the Dental Microscope - 105

- 108 The Lab Technician
- 108 Early University Dental Lab Research
- 109 Impression Evaluation
- 111 Casting and Die Examination
- 111 Die Surveying
- 111 Die Trimming and Marking of Die Margins
- 112 Margin Waxing and Wax density
- 112 Evaluating the Casting for Defects
- 113 Sprue Attachment to the Wax Pattern
- 113 Precision Seating of Casting on Dies
- 114 Margin Finishing and Polishing
- 114 Clinical Seating of Castings
- 116 Final thoughts on Dental Microscope Lab Use

7 The Dental Microscope Advantage - 119

- 121 The Microscope's Specific Advantage over Loupes
- 121 Relative Sizes in Dentistry
- 121 Illumination is Critical to Visual Resolution
- 122 Typical Magnification used in Dentistry
- 122 Stereopsis is Essential
- 123 You Must "See It" to "Believe It"

- 124 Microscope Benefits of Coaxial Lighting
- 124 Microscope's Superior Depth of Field and Field of View

Section II – How

- 125 Are Loupes Alone Adequate?
- 125 Multiple Operatories and Multiple Microscopes
- 126 Inter-oral Exam with a Patient Video Monitor
- 126 The Appointment Book and the Beginning Microscope User
- 127 Zen Benefits of the Microscope
- 127 Doing Away with Microscope Misconceptions

8 A Selection of Dental Photomicrographs - 129

9 Preparing for Learning - A Prelude to Training - 147

- 148 Dental Microscope Training in Just Five Exercises
- 148 Four Components of Dental Microscopy
- 149 Ergonomic Skills
- 149 Eye-Hand Motor Skills
- 150 Magnification Selection Skills
- 152 Mirror Skills
- 153 Two Primary Mirror Positions
- 158 First Four Training Exercises - Overview
- 158 Basic Armamentarium for Training Exercises
- 159 Microscope
- 161 Parfocal Procedure

10 Training Exercise One - Motor Skills - 163

- 165 No Mirror is used in this First Exercise
- 166 Required Burs for Exercises
- 166 Specific Gross Reduction Technique
- 167 Hand Piece Size Recommendations for Training
- 168 Training Exercise One Begins
- 168 Perform Crown Preparations While “Hand-Holding” Typodont
- 170 Compensating or Diminishing Fields of Video
- 170 Dealing with Depth of Field Issues

11 Training Exercise Two-Maxillary Anterior - 171

- 173 Exercise Two Basic Mirror-Skill Training Begins
- 174 Mirror Tour of the Maxillary Arch
- 174 Maxillary Anteriors
- 175 Veneer Preparations under Magnification
- 175 Extending Veneer Preparations
- 175 Direct or Indirect Vision – Getting the Proper View
- 176 Overcoming Psycho-Motor Challenges
- 176 Three Ways to Fine-Tune Focus
- 176 Higher Magnification Becomes Easier with Experience

12 Exercise Three-Maxillary Posterior - 177

- 179 Introducing the Mirror-Clock
- 180 Left Handed vs Right Handed Operators
- 180 9 O'clock and 11 O'clock Mirror Positions for #14
- 186 3 O'clock Mirror Position for #14
- 188 1 O'clock Mirror Position for # 14
- 192 9 O'clock Mirror Position for #3
- 194 11 O'clock Mirror Position for #3
- 198 3 O'clock Mirror Position for #3
- 200 1 O'clock Mirror Position for #3
- 204 What is the Best Magnification
- 204 Avoiding Iatrogenic Insult
- 205 Thoughts and Techniques for Early Mirror Use

13 Training Exercise Four-Mandibular Arch - 207

- 209 Cross Arch vs Parallel
- 211 Mandibular Arch Concepts
- 212 9 O'clock Mirror Position for #19
- 214 7 O'clock Mirror Position for #19
- 218 3 O'clock Mirror Position for #19
- 220 5 O'clock Mirror Position for #19
- 224 9 O'clock Mirror Position for #30
- 226 7 O'clock Mirror Position for #30

- 230 3 O'clock Mirror Position for #30
- 232 5 O'clock Mirror Position for #30
- 236 Elliptical Mirror Issue
- 236 Sequential Reduction

14 Mastering Efficiency - 241

- 243 A New Way of Thinking
- 243 Time Limits are Critical in this Exercise
- 243 Time Allocations Parameters: Micro vs Macro
- 243 Outline of Efficiency Exercise Procedures
- 244 Begin Crown Preparations in the lower Right Quadrant
- 244 Special Considerations for Micro Veneer Preparations
- 244 Final Thoughts

Conclusion - 247

- 247 Summary of Benefits
- 248 One Explanation for Slow Acceptance
- 248 In Conclusion

Index - 257
